PARALLEL FLOW (ACOUSTIC WALL & CEILING PANEL)

PARALLEL FLOW features angled surfaces and a chevron profile that create a sense of direction across walls and ceilings. Repeating panels form continuous bands, zigzag patterns, or larger geometric compositions. Light catches each fold, bringing depth and definition to the felt surface. Its sound-absorbing PET construction helps control reverberation in busy interiors. Choose similar shades for a soft transition or contrasting colors to emphasize the flowing pattern. PARALLEL FLOW suits workplaces, reception areas, lounges, and hospitality spaces.
