WAFFLE GRID (ACOUSTIC WALL & CEILING PANEL)

WAFFLE GRID features a structured pattern of raised rectangular sections separated by recessed channels. Its softly rounded edges give the geometric surface a cushioned appearance with subtle depth and shadow. Made from sound-absorbing PET felt, the panel helps control reverberation in shared interiors. Repeat the modules across larger surfaces to create a continuous grid, using one color or a coordinated mix of finishes. WAFFLE GRID suits offices, meeting rooms, lounges, and reception areas.
