# CRACKLE (ACOUSTIC WALL & CEILING PANEL)

CRACKLE features closely spaced linear ribs that create a rhythmic architectural surface. Its sculpted profile produces alternating bands of light and shadow, adding depth to walls and ceilings. Made from sound-absorbing PET felt, the panel helps reduce reverberation in busy interiors. Repeat the panels for a continuous ribbed finish or combine colors to define different sections of a space. CRACKLE suits offices, lounges, reception areas, and hospitality settings.
