CRACKLE EDGE (ACOUSTIC WALL & CEILING PANEL)

CRACKLE EDGE features a folded profile with pronounced ridges and a distinctive zigzag edge. Its dimensional surface creates strong shadow lines that emphasize the repeating geometry. The sound-absorbing PET felt helps control reverberation while adding texture to walls and ceilings. Alternate panel orientations and colors to form patterned compositions or align the folds for a continuous directional effect. CRACKLE EDGE suits collaborative workspaces, reception areas, lounges, and hospitality interiors.
