

MOON (ACOUSTIC COLLECTION)

The Moon series features round acoustic panels with a clean, pure form designed to enhance interior spaces through both aesthetics and acoustic comfort. Suspended from the ceiling with a central canopy, these panels offer a simple and refined ceiling presence that works beautifully in conference rooms, libraries, hotels, offices, public buildings, shopping malls, and other shared environments. The underside is finished with acoustic fabric, and the collection is available in black, white, and customizable finishes, with 36 acoustic felt color options to suit a wide range of design concepts.

Designed to improve the acoustic quality of a space, the Moon series helps reduce disturbing noise reflections and reverberation, creating a quieter and more comfortable environment. With quality craftsmanship, flexible MOQ options, and a five-year warranty, it is a practical solution for both standard and project-based applications. The packaging has also passed strict tests suitable for air shipping, while single-piece carton packing is ideal for stock and bulk packaging is well suited for larger project orders.

MATERIAL:

Aluminum, Polyester fiber

WARRANTY:

5 years

MAIN FEATURES:

Flexible MOQ

ETL listed, 5 years warranty

2 color finishes(black, white), can be customized

Down side incorporated with acoustic panel to reduce the noise in the space
